DRILLING

Metal

HSS METAL DRILLS

High Speed Steel drills have the best combination of strength, heat resistance, and wear resistance. HSS drills are ideal for drilling in metal, but can also be used for drilling in plastics and wood.

Stone/concrete

STONE/CONCRETE DRILLS

In our range of stone/concrete drills we have two categories: SDS-Plus type and SDS-Max type.

fits
SDS PLUS

SDS-Plus type has the advantage that you can plug in the drill with one fast action (quick fit). These drills are especially suitable for hammer drilling and chiseling.

fits
SDS MAX

SDS-Max type has the same advantage as SDS-Plus type but is suitable for more powerful and heavy duty.

Instructions

How to use a flat wood drill

STEP 1

Stop drilling when centerpoint reaches the bottom.

STEP 2

Turn your wood piece and put the centerpoint in the hole.

STEP 3

In this way you can drill a clean hole without burrs.

COUNTERSINK DRILLS

Used for making a conical hole to fit a countersunk screw.

Art. nr.	QTY	Type	Ø	Barcode
KRT011201	1 pc	COUNTER-SINK	10mm	5 400338 045752 >

KRT011204	1 pc	COUNTER-SINK	19mm	5 400338 045783 >

Instructions

How to use a countersink drill.

STEP 1
First drill a hole using a drill of the same diameter as your screw.

STEP 2
Drill with your countersink drill until your screw head fits.

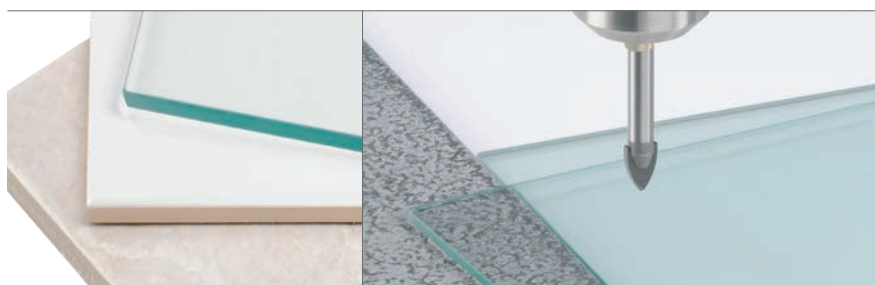

STEP 3
Your screw fits perfectly.

Ceramics

TILE/GLASS DRILLS

The spear point reduces cutting pressure for cleaner holes and without chipping or breaking.

Screwdriving

Kreator offers a full selection of screw bits for various screw head types and of various lengths, as well as a comprehensive range of sets with different screw bit combinations.

Screwdriver bits

S2 MATERIAL

The screw bits are made of S2 steel for heavy duty use. S2 steel is less ductile and far more prone to shattering, designed for long life and maximum durability.

Sawing

The right saw blade is key for a successful sawing project.
Make smooth, safe cuts with the different Kreator saw blades, for different types of saws.

Jigsaw blades

Kreator jigsaw blades are produced of high quality materials.
All jigsaw blades are available with both T-shank & universal shank.

Different types of shanks

New model: **T-shank** used with:
Powerplus, Black & Decker, Bosch, Makita, Skil, ...

Old model: **U-shank** used with:
Black & Decker, Power Base, Skil, ...

Types of metal used for blades

HCS

High Carbon Steel contains more than 0.3% carbon which makes the steel harder and less flexible. Ideal for **plastics** and **wood** fast and without deflection.

BIM

Bimetal flexes more, resists breaking and extends blade life.
Ideal for **woodwork, plastics** and **thin metal**.

HSS

High Speed Steel is a very hard and heat resistant steel. Ideal for **hard metal, aluminium** and **non-ferrous metals**.

HM

Metallic carbide has a tremendous capacity of resistance to wear and has the highest service life. Ideal for **ceramics**.

Circular saw blades

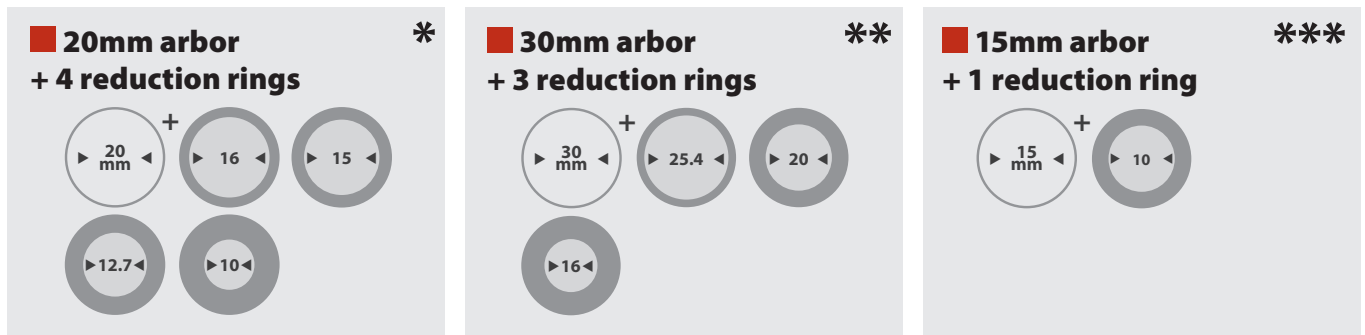

These circular saw blades are made of alloy steel that guarantees a combination of flexibility and hardness. The extra large metal teeth ensure a long service life.

WOOD	MULTI-USE	FOR USE WITH PLUNGE SAW/CIRCULAR SAW
		
<p>Ideal for sawing various kinds of softwood and hardwood.</p> <p>Small number of teeth: rough and fast sawing. Large number of teeth: clean saw cut.</p>	<p>Ideal for sawing light metals, plastics, laminate, parquet, ...</p> <p>Multi-purpose blade that cuts easily through a variety of materials.</p>	<p>Ideal for sawing various kinds of softwood, hardwood, laminate and wood with nails.</p> <p>Stays sharper, longer lifetime, bodyslots to reduce weight and minimise heat.</p>

SAWING

+ reduction rings

The extra reduction rings make sure that these saw blades fit almost all circular saws.

KREATOR

Router bits

Use Kreator router and journey bits (8mm) for rounding edges, shaping decorative edges on furniture/ framework, making grooves, or for creating an attractive accent with a classic woodworking design.

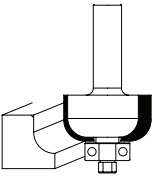

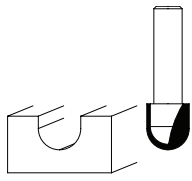

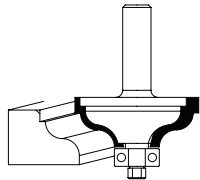

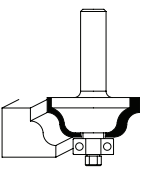

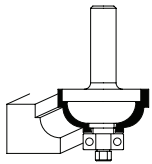

TUNGSTEN CARBIDE

The edges of the bits are made of tungsten carbide. This material is approximately three times harder than steel and is much denser than steel or titanium. Can only be polished and finished with diamond wheels and compounds.

Cutting & grinding

For every cutting or grinding job, there is the right Kreator accessory.
Make your choice from the wide range of diamond discs, bonded discs and rotary files.

Diamond discs for every job.

Kreator diamond discs are suitable to cut various hard materials. They are commonly used for building, remodeling and repairs. Diamond discs are often used for cutting stone, roof tiles, ceramics, concrete, brick, stone, and other materials with similar properties.

ECO	PREMIUM	ECO	PREMIUM	PREMIUM
CERAMICS		UNIVERSAL		TURBO
				
Continuous rim These discs provide the smoothest cut by ultra smooth chip-free cutting.		Segmented rim These universal discs cut smoothly through different kind of materials.		Serrated rim These discs provide the fastest cut and a smooth finish.
Ideal for cutting through ceramic tiles, marble and porcelain.		Ideal for cutting through stone, roof tiles, concrete, and other materials.		Ideal for cutting brick, roof tiles, concrete, ... and most brick applications where speed of cut is important.

Bonded discs

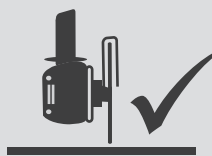

Please follow the disc color code when you choose between a metal or stone Kreator cutting disc according to the material being cut or grinded. Ensure that the correct wheel is properly mounted.

Colour code

DEPRESSED CENTRE CUTTING DISCS		THIN CUTTING-OFF WHEELS	DEPRESSED CENTRE GRINDING DISCS
METAL	STONE	INOX / METAL	METAL
			
			
Blue colour	Green colour	Grey colour	Red colour
At an angle of 90°. Suitable for cutting all types of metal.	At an angle of 90°. Suitable on all kinds of construction material, such as concrete, stone, roof tiles.	At an angle of 90°. Suitable for thin sheet metal such as steel cable, profile sections and pipes.	At an angle of 45°. Suitable for metal grinding applications.
			

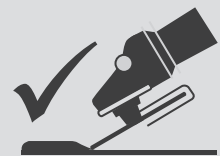

Cutting discs

Our wide range of cutting discs enable you to make a clean cut in the shortest time and with a minimum amount of force.

Grinding discs

Our range of grinding discs enable you to make a high performance smooth grinding action.

METAL

Suitable for cutting all types of metal.
